

ACADEMIC RESEARCH &

INDUSTRY-ACADEMIA-GOVERNMENT COLLABORATION

NAGOYA UNIVERSITY

2023 Edition

Collective support for academic research and industry-academia-government collaboration under one roof

TOP MESSAGE

Akihiro Sasoh Nagoya University

Vice President

Director of Academic Research & Industry-Academia-Government In recent years, we have faced an increasing number of threats and dramatic social changes, such as infectious diseases, conflicts, and natural disasters. Scientific and technological developments and promoting innovation are key to solving the many social issues facing us and ensuring our safety, and universities are playing greater roles and bearing higher expectations.

The universities of today and tomorrow must play a leading role as a driving force for sustainable social development, not only by boosting investments in basic research and human resource development to build a foundation of "knowledge," but also by actively engaging in utilizing research results that are intellectual properties in society and for creating start-ups.

In AY 2013, Nagoya University established the Academic Research & Industry-Academia-Government Collaboration as an integrated system to advance research activities ranging from basic research to industry-academia-government collaborations. Nagoya University boasts the largest number of URAs (university research administrators) in Japan and has long been active in supporting academic research and industry-academia-government collaboration alongside the Research Cooperation Department at Administration Services.

In AY 2020, Nagoya University and Gifu University merged to form the Tokai National Higher Education and Research System (THERS), and starting in AY 2023, the URAs of both universities belong to the Academic Research and Industry-Academia-Government Collaboration at THERS. The new structure is designed to strengthen support for research and industry-academia collaborations by taking advantage of the synergistic effects of mutual collaboration.

We strive to further enhance support for researchers THERS-wide and build an innovation ecosystem. To this end, we will continue to actively engage in industry-academia collaboration not only among local universities, companies, and society, but also on a global scale.

We hope that you will take full advantage of all that the Academic Research & Industry-Academia-Government Collaboration has to offer. With your support, together we can make great strides forward.

DIVISIONS

Planning & Project Division

Strategy Planning Unit

strategic planning

· Academic-Industry collaborative

Research Planning

Project Promotion Unit

Management of Large-scale
 projects

Public Relations Unit

- Dissemination of research results
- Outreach activitiesWebsite management
- website management

Grasping research seeds within
 the university

Formation of location based research projects

· Operation of the Academic Research & Industry-Academia-Government Collaboration

Research Support & Personnel Development Division

Research Promotion Unit

 Grants-in-Aid for Scientific Research and competitive research fund acquisition support (Support for each research field support for foreign researchers)

Research Integrity Unit

Centralized management of research information data
 Total risk management

IR Unit

- IR analysis and strategy proposals
- Survey and analysis of research capabilities
- Operation and management of research support database

Human Resource Development Unit

- Fostering Young PIs
- · Supporting projects for fostering young researchers

Industry-Academia Collaboration & International Strategy Division

Industry-Academia Collaboration Unit

- Strategic planning for collaborative research
- Management of collaborative research
- Support for comprehensive collaborative agreements
 Promotion of designated collaborative research
- Regional SME (small-medium enterprise) collaboration

International Strategy Unit

- · International industry-academia collaboration
- Supporting contracts with foreign countries
 Besserve on European and American affairs
- Research on European and American affairs

Medical Innovation Division (MIU)

- Planning and promotion of industry-academia collaboration in the field of medical and pharmaceutical sciences
 Support for research in the field of medical and pharmaceutical sciences
- Biodesign promotion and education

Intellectual Property & Technology Transfer Division

- \cdot Support for creation, filing, and acquisition of intellectual property rights
- Technology transfers, including licensing and assignment of intellectual property rights
- Review of joint research agreements

Start-up Division

Entrepreneurship Education Unit

- Human resource development for supporting start-ups • Operation of the star-tup base
- Collaboration with global startup cities in Japan
- Tongali(Entrepreneurship education and Incubation in the Tokai region)

Incubation Unit

- Supports for starting a business
- Planning and operation of Gap funds and research seeds development funds
- $\boldsymbol{\cdot}$ Planning and operation of incubation programs
